

INSTANT INSULATION!

A new solution to old problems!

Pipe that is too close to a wall
Equipment with very little clearance
Damp environments
Steam pits that are damp
Burn areas that need protection

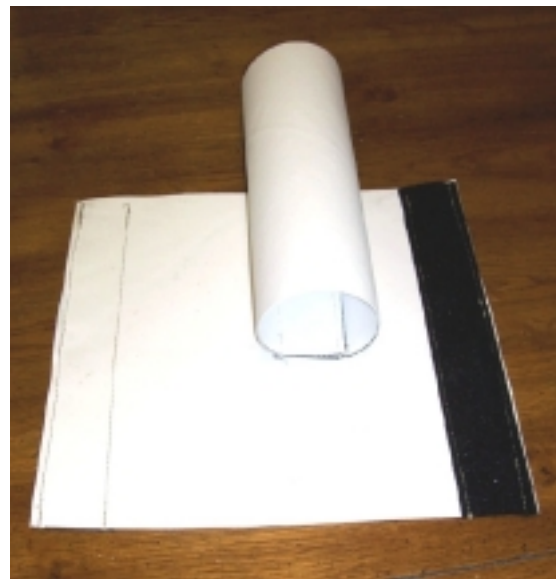

FITS ANY PIPE LENGTH AND CAN BE CUT TO FIT WITH SCISSORS

Ceramcloth (patent pending) is a new self-applied removable-reusable insulating wrap for pipes or almost any equipment. This space-age ceramic coating reflects 95-98% of radiant heat and 90-93% conductive heat for outstanding insulation values (R=18e), YET IT IS SOFT AND FLEXIBLE ENOUGH TO WRAP AROUND A PIPE.

Ceramcloth comes in standard 5' lengths. We can also make custom lengths for any size pipe or piece of equipment.

It's EASY & FAST to install! You simply wrap the Ceramcloth around the pipe and close it with the sewn-on hook & loop closure strips located along the long edges. Ceramcloth can be cut to size with scissors for pieces less than 5' long or you can order specific lengths to fit your needs.

- Easily removed for inspections, etc.
- Provides OSHA burn protection
- Installs quickly & easily by virtually anyone
- Cannot absorb moisture – NO rotting or wet insulation
- Resists both high & low pH chemicals
- Class 1 fire rating (flame=5; smoke=5)
- Not hazardous
- Install year-around
- Excellent for food processing areas (no particulate release)
- Adds R-value to existing removable covers
- Works for 0°F to 600°F
- Not UV vulnerable
- Wrap HVAC ducts
